CAP Holding initiated an appraisal with EIB for a green loan

We inform that the European investment bank initiated an appraisal for the granting of a green loan of up to € 100 million to CAP Holding (Cap Water Investment Green Loan), in support of the projects in the integrated water sector scheduled for the period 2022-2025 and planned in the industrial and sustainability 2021-2025 Plan of the CAP Group, approved by the shareholders' meeting of 25.05.2021.

The investments covered by the program will have a positive environmental impact, because the focus will be on energy saving, efficiency in the use of water resources, environmental protection and adaptation to climatic events.
